BFAD clients may utilize the testing capabilities of the above stated recognized laboratories for the testing of their products. Test results, however, may be evaluated/verified by BFAD and may be used to meet specific BFAD requirements and other industry requirements whenever necessary.

All the above-mentioned laboratories (except for FDC & NSRI) were already audited and have passed the minimum requirements set by BFAD (as per Guidelines on Laboratory Recognition).

For your information and guidance.

 Director IV

**NOTE:**

*BFAD Recognized Laboratories refer to laboratories that are acknowledged by BFAD for their compliance to the quality system requirements or criteria based on PNS ISO/IEC 17025:2000, "General Requirements for Competence of Testing and Calibration Laboratories". It should be emphasized that the Recognition Process has not assessed the technical applicability of its test method used in the analysis. Hence, acceptability of test results from these laboratories would depend on the needs or requirements of requesting party.*
