Based on the results of the laboratory analyses conducted by the FDA, it was found that the affected batches did not conform to the set specifications of assay tests. The assay of a drug product determines the (1) presence of a substance and the amount of that substance, or (2) the pharmaceutical potency of a drug. Therefore, the stated batches present quality and efficacy concerns.

Mupirocin is a topical antibacterial agent, active against those organisms responsible for the majority of skin infections. It is used for skin infections, e.g., impetigo, folliculitis, furunculosis in adults, adolescents, children, and infants aged 4 weeks and older. Mupirocin 20 mg/g (2% w/w) Ointment [Mupizee] is packed in a collapsible plastic tube.

Therefore, distributors, hospitals, retailers, pharmacies, or clinics that have the affected batches of the product are instructed to discontinue further distribution, sale, and use. Likewise, all consumers are advised not to use or purchase the affected product batches and may contact Eon Pharmatek Inc. by sending an e-mail to eonpharmaRA@gmail.com for any question or additional information regarding the recall.

All Local Government Units (LGU) and Law Enforcement Agencies (LEAs) are requested to ensure that the affected product batches are not sold or made available in their localities or areas of jurisdiction.

For more information and inquiries, please e-mail us at cdr_postmarketsurveillance@fda.gov.ph. To report continuous sale or distribution of the abovementioned, kindly e-mail us via ereport@fda.gov.ph. You may also call the Center for Drug Regulation and Research at telephone number (02) 8809-5596. Any suspected adverse reaction experienced from the use of the products should be reported immediately to the FDA through this link: <https://primaryreporting.who-umc.org/Reporting/Reporter?OrganizationID=PH> and fill-out all of the required fields.

Dissemination of the information to all concerned is requested.
