**LOT NO. 1414**

Oxytocin is used for the induction and augmentation of labour, to control postpartum bleeding and uterine hypotonicity in the third stage of labour, and to promote lactation in cases of faulty milk ejection.

Therefore, distributors, hospitals, retailers, pharmacies, or clinics are instructed to **cease distribution, sale and use** of the aforementioned lot numbers of **EXERTA 10 IU/mL Solution for Injection (I.M./I.V./S.C.) effective immediately**. We advise that **remaining stocks if any, be sealed, labeled “REJECTED” and quarantined immediately and stored under lock & key**. Likewise, all consumers are advised not to use or purchase the affected product batches and may contact The Cathay Drug Co., Inc. by sending an email to [info@cathaydrug.com](mailto:info@cathaydrug.com) for return of the product.

For suspected adverse drug reaction, report to the FDA: [www.fda.gov.ph](http://www.fda.gov.ph) or at [info@cathaydrug.com](mailto:info@cathaydrug.com)
