

ANNEX C
Product Standards

A. TCCA products shall comply with the following adopted safety standards addressing flammability, mechanical, physical, toxicological, electrical, thermal and other hazards, and their future amendments or updates, as may be applicable:

1. Toys

- i. PNS/BHDT ISO 8124-1:2008 – Safety of toys – Part 1: Safety aspects related to mechanical and physical properties or their accepted equivalent
- ii. PNS/BHDT ISO 8124-2:2008 – Safety of toys – Part 2: Flammability or its accepted equivalent
- iii. PNS/BHDT ISO 8124-3:2008 – Safety of toys – Part 3: Migration of certain elements or their accepted equivalent
- iv. PNS/BHDT ISO 8124-4:2012 – Safety of toys – Part 4: Swings slides and similar activity toys for indoor and outdoor family domestic use or its accepted equivalent
- v. PNS ISO 8124-7:2022 – Safety of toys – Part 7: Requirements and test methods for finger paints
- vi. PNS ISO 8124-10:2022 – Safety of toys – Part 10: Experimental sets for chemistry and related activities
- vii. PNS ISO 8124-11:2022 – Safety of toys – Part 11: Chemical toys (sets) other than experimental sets

2. Childcare articles

- i. PNS/BHDT ISO 8124-3:2008 – Safety of toys – Part 3: Migration of certain elements or their accepted equivalent

B. TCCA products must be free from substances banned by the DOH and the FDA and/or must not contain ingredients restricted by the DOH and the FDA in concentrations exceeding allowable limits.

1. TCCA products must not contain the following phthalates exceeding the limit of 0.1 percent:

- i. di-(2-ethylhexyl)phthalate (DEHP)
- ii. dibutyl phthalate (DBP)
- iii. benzyl butyl phthalate (BBP)
- iv. diisobutyl phthalate (DIBP)
- v. diisononyl phthalate (DINP)*
- vi. diisodecyl phthalate (DIDP)*
- vii. di-n-octyl phthalate (DNOP)*

*Limit applies only for TCCA that can be placed in the mouth

2. Childcare articles, particularly infant feeding bottles and sippy cups, shall not contain Bisphenol A (BPA).

3. An updated list of banned substances shall be kept, maintained and published through the appropriate FDA issuances
